Regional exchange on the energy transition at BELECTRIC

- Meet & Greet at BELECTRIC headquarters with Wölfe Würzburg and the handball club's partners
- Exchange around cooperation opportunities in the regional energy transition

Kolitzheim (Germany) – At its headquarters in Kolitzheim, the solar company BELECTRIC hosted a Meet & Greet with players and representatives of the handball club Wölfe Würzburg as well as the club's partners. The companies present exchanged views on cooperation opportunities in the regional energy transition.

On October 9th, 2023, the Franconian solar company BELECTRIC met with representatives of the handball club Wölfe Würzburg and the club's partners at its headquarters in Kolitzheim near Schweinfurt to discuss the regional energy transition. After a joint tour of a solar farm constructed by BELECTRIC, the attendees discussed how they could cooperate to make the Main-Franconia region a little more sustainable. One of the topics was the leasing of areas for solar power plants and its positive influence on local biodiversity.

Roland Sauer, Managing Director of Wölfe Würzburg, comments: "From the point of view of all participants, it was a successful event. The management of BELECTRIC impressively presented their concept for climate and environmentally friendly energy projects. In many individual discussions, the topic of sustainability as well as BELECTRIC's vision were discussed in greater depth. Wölfe Würzburg are proud to carry this vision to the outside world and to support it through their network!"

In addition to BELECTRIC employees from various departments and the Wölfe Würzburg, representatives from seven regional companies were present. Towards the end of the event, the attendees were happy about a celebrity visit: the players from the third-division handball team stopped by for a Meet & Greet, took photos with the participants and signed autographs.

Thorsten Blanke, Managing Director of BELECTRIC, was pleased about the visit: "We support the Wölfe Würzburg because we are rooted in this region. It is important to us. Together, we discuss the energy transition and evaluate whether there can be specific projects to advance our home region."

BELECTRIC is one of Europe's leading EPC service providers in the development, construction and operation of solar power plants. The solar energy specialist looks back on more than 20 years of experience in power plant construction and has built over 4.4 gigawatts of capacity worldwide. BELECTRIC is a member of Elevion Group. Elevion Group B.V. is a European solution provider for all tasks related to the intelligent use of energy. With its focus on integrated energy services (ESCO), the Elevion Group delivers solutions that seamlessly combine sustainable CO2 reduction, continuous increase in energy efficiency, significant savings in energy costs, systems for renewable energy and all areas of technical building equipment and services. With over 60 consolidated companies the group operates in more than 12 countries, including Germany, Austria, Italy, Poland, Romania and Hungary.
