BELECTRIC and the 360°-PV-Solution

A driver of climate protection

Ground-mounted PV systems

The challenge

Strategy of the German Government for photovoltaics:

- Target for 2035: Becoming climate neutral to limit global warming to max. 1.5°
- Results in the following PV demand* until 2030:

215_{GW} = 301.120

installed capacity football fields

*ground-mounted, roof and balcony PV systems

The solution

Expansion of ground-mounted PV systems with BELECTRIC as "official partner of the sun"

For a sustainable future worth living
Our vision

We are a leading solar company for climate and environmentally friendly energy projects in Europe and Israel and make a clear **contribution to the energy transition.**

More than EPC

Our service portfolio

Our all-around carefree package

We accompany projects from A to Z: from consulting and development to construction and maintenance of solar systems.

Our core capabilities

Innovation &
System Design

Project Development

Engineering, Procurement &
Construction (EPC)

Operation &
Maintenance (O&M)

of solar and hybrid plants as well as
battery storage systems

Solar energy for a green future

Facts and figures

>500
PV projects

>2.2 GW
in O&M

~5 GW
installed capacity

8
focus markets
in Europe

13
locations,
headquarters: Kolitzheim

23
years of experience

>500
employees

From PV pioneer to market leader

Success through internationalisation and innovation

< 10 years from start-up to global player

1st EPC company worldwide with an installed capacity of > 1 GW

Member of Elevation Group

Pioneers in the development of PV systems

2001

Early Mover: Opening up new markets

2012

Financially strong parent company by our side

2021

For a secure energy supply

Our products

Solar farms

Hybrid systems

Worldwide experience

- Experts in the development and construction of ground-mounted systems
- Individual project concepts according to your business case

A powerful combination

- PV and battery storage from a single source
- Integration into the overall system – from construction to grid connection
- Standalone energy storage system possible

Always on the cutting edge

Our products

Floating PV

Experience meets track record

- Several benchmark projects in Israel
- Design according to your requirements and on-site conditions

Agri-PV

Dual land use for dual value

- Solar tracker systems beside the crops for an agricultural use between the rows
- Standard mode of operation as well as farming mode

An all-around PV solution

Asset Management

Commercial Management
Administration & Controlling
Benchmarking & Optimisation

System optimisation for maximum profitability

Innovation & System Design

Innovation Monitoring

Continuous evaluation of new PV technologies and applications

System Design Optimisation

- Simulation-based plant optimisation
- Selection of the most economic solution

Optimisation as a service

- Decision support early on
- Simulation-based analysis of all relevant system design configurations

Carefree package in Germany

Project Development

Scouting & Lease

- Examination of the areas for suitability, eligibility for remuneration and profitability
- Evaluation of all options regarding area and design

Building law

- Accompaniment of the urban land use planning procedure until the plant is ready for construction
- Obtaining permits & covering all development costs

Close contact with authorities

- Possibilities of participation for municipalities
- Promoting regional biodiversity

Our
commitment:
**Optimal
planning of
PV systems**

Over 4.8 gigawatts of installed capacity

EPC experience worldwide

Engineering

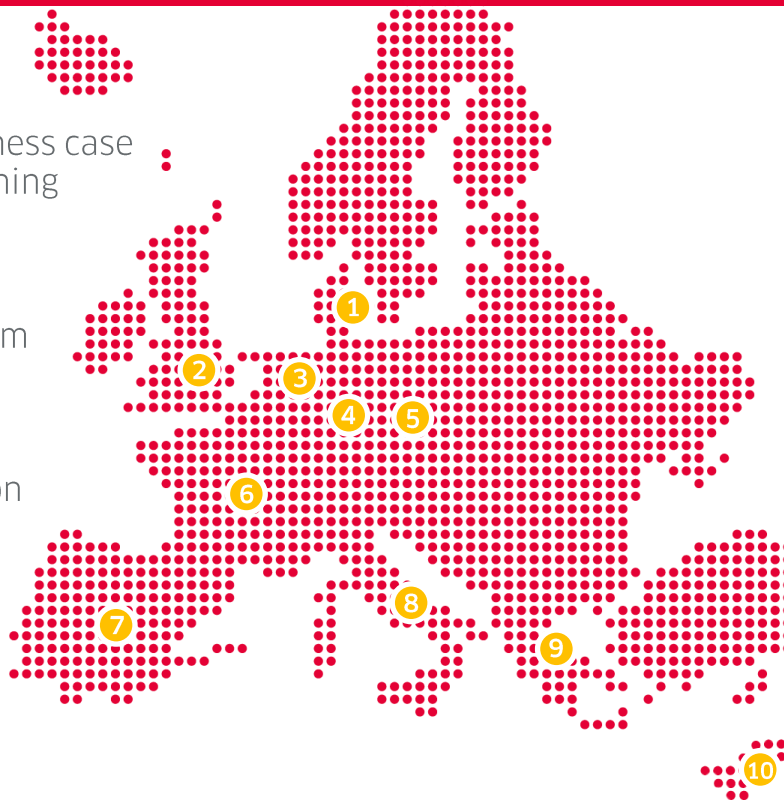

- Individually according to business case
- Simulation-based project planning

Procurement

- High quality components
- Cross-divisional logistics system

Construction

- On time and precise
- Nature-friendly implementation

Installed PV capacity (MW) in Europe and Israel

1	Denmark	13
2	UK	161
3	Netherlands	246
4	Germany	1054
5	Czech Rep.	7
6	France	348
7	Spain	89
8	Italy	67
9	Greece	7
10	Israel	861

Quality in Project- & Construction Management

EPC experience worldwide

Maximum efficiency in the execution of solar projects

- Experienced project managers and well-practised construction site teams
- Detailed project planning as well as balanced opportunity and risk management
- Effective time management and high transparency

Reliable quality standards

- From guidelines to mandatory training: QHS&E is in our DNA
- Our certifications:
ISO 45001 (formerly OHSAS 18001)
ISO 9001 : 2015

Years of experience in all climate zones

Operations & Maintenance

Operations

Technical management

Maintenance

Maintenance of the PV systems

> 2.2 GW
in O&M
worldwide

Capacity (MW) in O&M in Europe und Israel

1	UK	353
2	Netherlands	204
3	Germany	910
4	France	86
5	Italy	226
6	Israel	431

Competent and reliable Operations & Maintenance

Performance Services

- Real-time monitoring and in-house Control Room
- Error detection and diagnosis
- Big Data Analysis
- Repowering

Technical Asset Management

- Spare part management
- Warranty management
- Automated end-to-end IT processes

Inspection & Maintenance

- Preventive, not just reactive
- State-of-the-art technologies to ensure highest availability
- LV, MV & HV services

We take responsibility

Environmental Social Governance

Environmental

- **Recycling**
- **Biodiversity**
Solar farms contribute to biodiversity

Governance

- **Supply chain diligence**
Declarations of commitment from suppliers
- **Code of Conduct**
Code of Conduct for all employees and suppliers

One with the environment

Energy generation in harmony with nature

> 99 % of natural areas remain

Retreats for native animal and plant species

Flocks of sheep tend to the greens and save CO2

Climate and species protection hand in hand

We support biodiversity

Our measures

- Sowing species-rich wildflower mixtures
- Mowing concepts adapted to bees
- Construction of amphibian, bee or bat hotels
- Foundations of the solar modules are rammed, not concreted

Increasing the
bee population

Strong relationships with strong partners
